Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Suda et al. (US 4,970,780).

Suda shows a structure of a device comprising a first element (see Fig. 1) having a first surface and a plurality of contacts 3 exposed at the first surface; a second element 4 having a top surface and a plurality of contacts 5 exposed at the top surface; and a bump 10 that serves as conductive elastomeric posts (see column 3 for example, lines 18-20) wherein each of the contacts of the first element is respectively aligned with one of the contacts of the second element, and wherein at least some of the contacts of the first element are connected to the respectively aligned contacts of the second

element by the conductive elastomeric material (see column 3, lines 65+, and column 4, lines 1+).

Allowable Subject Matter

4. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Akram (US 6,717,422 B2) shows elastomer members 17, and Love (US 5,477,160) shows a structure with a conductive elastomer disposed between a first and second elements 101 and 103.
